

VAP® Patent and Patent Infringement Management

Airbus and Trans-Textil are owners of patents on membrane products and processes in the field of vacuum infusion, e.g. VAP® vacuum infusion process (DE 102010 011 067 B4 and DE 10 2008 006261 B3 as well as international PCT patent application WO 2011/110340 A1 and WO 2009/092543 A1, as well as domestic and foreign patent applications and patents resulting therefrom).

Without the consent of Airbus and Trans-Textil, the patented membrane products may not be manufactured, offered, supplied, placed on the market, used or imported for the aforementioned purposes, nor may they be owned. The use of such membrane products for resin infusion processes is only permitted in connection with membrane products manufactured by Trans-Textil GmbH. The membrane products are purchased from the authorized distributor Composyst GmbH.

VAP® and the VAP logo are internationally registered trademarks of Airbus Defence and Space GmbH. Their use is only permitted with the consent of the trademark owner.

Infringements of national and international intellectual property rights will be prosecuted without exception and worldwide by the patent holders Airbus and Trans-Textil under both civil and criminal law. The following measures are taken to protect intellectual property and enforce property rights:

- Continuous international market monitoring by technical experts and patent attorneys.
- Obligation of VAP® partners to report all cases of patent infringement to Airbus and Trans-Textil
- Information about the clearly described legal situation and patent system
- Punitive cease and desist declaration
- Confiscation of components manufactured without a valid license
- Further legal measures such as injunctions and infringement suits with claims for injunctive relief, information and damages
